

EXTIRA COMPOSITE · PRIMED FREE · SHIPS IN ABOUT 3-4 WEEKS

Composite Shutters

The look of wood with none of the worry: Extira composite will not rot, split or warp, and it comes primed.

- ☉ **Seven types:** louvered in three louver sizes, raised panel, flat panel, board and batten, framed board and batten
- ☉ Louvers and boards **routed from one solid piece**, so nothing can loosen
- ☉ **1-1/4"** thick with 2-1/2" stiles and rails
- ☉ **Primed free** (General Finishes Enduro White Undercoat); painted finishes available
- ☉ Custom sized to the **1/8"**. Order online up to 24" wide x 96" long; to 55" wide by quote
- ☉ **Free shipping** on shutters under 76" long
- ☉ Ships in approximately **3-4 weeks**, backed by our 5-year material and workmanship warranty

Seven Types

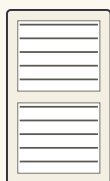

Louvered and panel shutters use the same rail layouts as our wood lines (100, 50/50, 20/40/40 and more); board and batten comes with 2 or 3 battens, a Z-bar or an X-bar.

Louvered
1-1/8" louvers

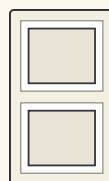

Louvered
1-3/4" louvers (standard)

Louvered
3" louvers

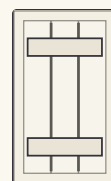

Raised panel
raised front, or both sides

Flat panel
clean, modern face

Board & batten
V-grooves; 2/3 battens, Z or X-bar

Framed B&B
boards inside a frame

Why Extira

Made for weather — an engineered exterior panel that resists moisture, rot and termites and holds paint for years. It does not split, check or warp the way solid wood can in a wet or humid climate.

One-piece construction — louvers and vertical boards are routed out of a single solid piece, so there are no joints to open up.

Faster — composite skips the drying and milling steps solid lumber needs, so these ship in approximately 3-4 weeks.

Paint-grade — composite is made to be painted and should not be stained.

Finishes

Primed — free: General Finishes Enduro White Undercoat, an exterior water-based primer tinted medium grey.

Painted — General Finishes Exterior 450 water-based topcoat, satin. In-stock colors or a custom color match; arrives ready to hang.

Specifications

Extra composite	
Shutter thickness	1-1/4"
Stiles and rails	2-1/2" wide
Bottom rail	2-1/2"+ wide
Louver sizes	1-1/8", 1-3/4" or 3" faux louvers, routed from solid material
Panels	raised (front, or both sides as an option) or flat; louver-over-panel to order
Board and batten	1" boards with routed V-grooves, 5/8" x 3-1/2" battens; 2 or 3 battens, Z-bar or X-bar; framed style available
Primer	General Finishes Enduro White Undercoat, applied free
Maximum size	24" wide x 96" long online; up to 55" wide by quote

Every shutter is custom sized to the 1/8". An arched shutter's length includes the arch. Measuring guide: www.sunbeltshutters.com/how-to-measure-shutters.asp

Built-to-Order Options

Arch top — tell us the spring line; the length should include the arch.

Louver over panel — louvers in the upper section, a raised panel below.

Faux tilt rod — the traditional look of operable louvers.

Panel raised on both sides — for shutters seen from inside and out.

Custom cut-out — email your preferred shape.

Custom stiles, rails, horns and tails — sizes and period details to order.

Hardware, Shipping and Warranty

Hardware — hinges, pintles, holdbacks and slide bolts from our hardware collection are made to pair with these shutters.

Shipping — free on shutters under 76" long. Longer shutters ship by freight at a quoted rate.

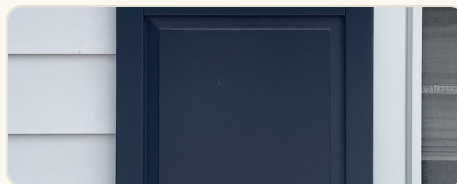

Lead time — approximately 3–4 weeks from order to shipment; each pair is built to order.

Warranty — five years against defects in material and workmanship. Details and the claim form are at www.sunbeltshutters.com/warranty.asp.

On Real Homes

Louvered, painted black.

Navy raised panel.

Raised panel with a cutout.
